

## Reviews for PetZone Flea & Tick Protector Patches for Pets

**Jennafer Kaiser, Goose Creek** – March 22, 2016

Just when I thought it couldn't get any better, just found out the new ones are good for 6 months at a time compared to having to swap them out every 2 months. Talk about more convenience. I still have one more set of the older ones here to use, and will be ordering the new ones when they officially come out. My 2 Bullies have been off that awful stuff for 3 years now, and I keep these pet protector tags on them year round. They work great or I wouldn't be putting my two cents in. Try them, you've got nothing to lose and everything to gain with healthier dogs.

**Fabio** – September 12, 2015

As a Yorkie breeder, my first concern is always the health of my pups and their mom and dad, and we do everything as close to nature as possible including feeding raw. When these patches first came out, I wanted them for my adults and 2 cats and even though cost was no factor, I'm still a haggler by nature. All I can tell you is if you have a lot of animals you want to protect from the bugs, just ask Bree and she might work something out with you. She's good people and really puts the animals first. We're coming into our 3<sup>rd</sup> season of using these patches and they work exactly like they're designed to. Just make sure your home and pets are prepped first, people who say they don't work is because their dogs were already infested and didn't follow the simple instructions.

**Katie D.** – May 28, 2015

This is our second season using these, and they work great.

**Becka Rhodes** – August 3, 2014

Been using since early February this year and it does what it's supposed to do. I only gave it 4 stars because instructions weren't clear enough to me that my dog and house needs to be free of fleas and stuff first cause we still had fleas after I put this patch on. After I talked with Bree about this, she gave me the detailed scoop on how to prepare my dog and house, and we haven't seen a flea all summer, and we live in northern part of Florida. As good as it might appear, this patch really does work.

**Kelly W.** – July 17, 2014

After one week of wearing the patch I found two fleas on my schnoodle. Would not recommend this product.

**Danny Boy** – March 1, 2014

I feel so blessed to have come across your Flea and Tick product. I have used products that were too expensive and really didn't do the job. Once I started using the product on my six dogs and three cats it was like magic. The disk is so easy to use and your generosity for keeping it at a great price is unbelievable. God bless you. I will continue to support.

**little gramma** – October 2, 2013

Almost 2 months wearing them, so far so good with my dogs. What a huge relieve getting them off the bad stuff. Thank you very much.

**NeilPet** – September 28, 2013

So far, this patch works exactly as it's supposed to, and I couldn't be more pleased. I've learned a lot from your site over the years, and you're still always on target. You seem to know what I'm looking for and then magically I find it. But back to the patches, I bought the 2-pack cause of the discount, and glad I did. One for my older cat and the other for my new puppy. Feels great knowing I don't have to worry about fleas anymore or harming my animals with chemicals. I love my animals far too much and always want what's best for them. Thank you very much, from sugar and spice too.

**JenaLee** – September 24, 2013

I was so happy to find out about your product back in March after I lost one of my sweet Collies to, what I believe, health issues caused by frontline. Amazing my other 2 Collies never suffered anything serious. We've had a flea free summer down here in sunny Florida, and they weren't even bugged by the fire ants! What a blessing this Pet Protector has turned into, and not one worry about what poison will hurt them again. I've already been sending your site to all my pet friends and expect you'll be running out of your stock quickly! Thank you again for all your dedicated work in teaching us how to keep our soul animals with us longer.

**Melinda Basque** – August 29, 2013

I like these patches because they're so practical to use. I don't have to spray or rub anything on Monte cause dogs lick themselves often and there's no worries about him digesting chemicals from his flea and tick protection. It's working great!

**Lizzy** – August 18, 2013

I just gave Gizmo a bath and not one flea or tick. He's been wearing his patch on his id tag for a little over a year now, and we all could not be happier. He loves the beach and we have never taken the patch off. We live in a high risk area in the bush too, so I highly recommend to everyone.
